Its that simple. No Assembly Costs. Save on Vac Truck costs while being environmentally responsible. This drastically reduces your expensive environmental cleanup costs. Field Tested and Proven. Single wall and dual wall are available. The FUSION TM Intelligent Calibration is an insitu test; thus, accounting for intake head, viscosity, and injection pressure. The FUSION TM learns what the operator is trying to achieve during calibration and performs the necessary calibration calculations so the operator does not have to. Visual Rate Feedback eliminates the guess work with setting rates. The real time chemical flow rates are read by the FUSION TM controller for analysis, then the injection rates are automatically adjusted if necessary without human input. Sirius provides a range of products that help the petroleum industry meet these challenges.

Serious injury or death can resu lt if safety instructions are not follow ed. WARNING Read this manual. Serious injury or death can result if safety instructions are not followed. Pump is shipped with oil. Must check oil level before use. Remove shipping plug and install vented fill cap. Page 4 Important Safety Rules WARNING 1. Read owners manual completely. Serious injury or death can result if safety instructions are not followed. You must be 16 or older to operate this machine. Keep untrained people away. 2. Skin puncture hazard. High pressure fluid can inject under skin resulting in serious injury including amputation. Do not direct spray at people or animals. If skin injection happens, seek IMMEDIATE surgical treatment. Do not check for leaks with hand. Page 5 Important Safety Rules WARNING 5. Risk of exposure to dangerous chemicals. Serious injury or death can result if chemical manufacturer instructions are not followed. Wear protective gloves when handling and cleaning with chemicals. Understand all safety hazards and first aid for all chemicals being used. When cleaning filters, check if chemicals have been used and take any precautions that are recommended by the chemical manufacturer. Page 6 Pump Oil Cap and Pump Component Identification 6 Page 7 Operation Instructions Water Supply 1. Make sure the water supply is clean. Debris can cause excess pump wear and reduce performance. 2. An insufficient water supply will damage your pump. Make sure the water supply is steady and is 20% over the rated flow of your pump. Use a stopwatch to time how long it takes to fill a 5 gallon bucket with your garden hose. The bucket must fill faster than the times listed in the table below. WARNING Skin puncture hazard. Page 9 Operation Instructions Applying Chemicals 1. 2. 3. 4. 5. Install the black nozzle to spray chemicals onto the cleaning surface. Start the pressure washer according to the startup instructions. Submerge the chemical hose in cleaning solution.

Squeeze the spray gun trigger. The chemical injector will draw the chemical into the water stream. Apply chemicals evenly onto the cleaning surface. Allow the chemicals to react with the dirt, then clean at high pressure with green nozzle. 6. Page 10 Maintenance and Storage Maintenance Mode Before performing any maintenance on the pressure washer, it must be placed in maintenance mode. 1. Turn off engine. 2. Turn off water supply. 3. Squeeze trigger to relieve system pressure. 4. Shut off fuel valve. 5. Unplug spark plug wire from spark plug, see engine owners' manual. Page 11 Maintenance and Storage Pump Oil Change 1. Place a suitable container below the pump to catch used oil, then remove the oil fill cap and oil drain plug. 2. Allow the used oil to drain completely, then reinstall the drain plug and tighten securely. 3. Please dispose of used oil in a manner that is compatible with the environment. We suggest you take used oil in a sealed container to your local recycling center or service station for reclamation. Remove the dipstick from the breather plug. Then remove the breather plug from the pump. 3. Wipe the dipstick off with a clean dry cloth. Insert

the dipstick into the pump housing and remove it. Page 46 Limited Warranty Dear Valued Customer The Northstar or Powerhorse Product you just purchased is built with the finest material and craftsmanship. Use this product properly and enjoy the benefits from its high performance. By purchasing a Northstar or Powerhorse product, you show a desire for quality and durability. Like all mechanical equipment this unit requires a due amount of care. Treat this unit like the high quality piece of machinery it is. Neglect and improper handling may impair its performance. Select pumps and valves using KSB Easy Select, KSBase Consult Building and KSBHelps. Find the relevant information and your contact person. Our customers also benefit from our extensive experience, our service they can count on all across the globe, and our indepth technical expertise that have made us one of the biggest names in pump manufacturing. The centrepiece of the KSB pump portfolio is the centrifugal pump. Types include, for example submersible pumps, waste water pumps or circulator pumps. As one of the leading manufacturers of industrial valves and industrial pumps, we are always close to our customers Founded in 1871 in Frankenthal, Germany, KSB has been one of the leading providers in its field for over 100 years. An experienced pump manufacturer, we have a presence on all continents with our own sales and marketing organisations, manufacturing facilities and service operations. KSB is represented in over 100 countries and employs more than 15,500 people. We also have 170 service centres and over 3,000 service staff to provide inspection, maintenance and repair services for industrial pumps and industrial valves as well as spare parts worldwide.

When you choose KSB, you are sure to get the best service straight from the same company that makes your pumps and valves. KSB's formula for success innovation plus proven solutions Customers opt for KSB products because they combine highly innovative technology with pumps and industrial valves that have stood the test of time. Etanorm, for example, is the most successful water pump in the world. Since then, we have sold over 1.5 million of these standardised water pumps. This impressive figure makes Etanorm the most successful standardised water pump on the global market. KSB also has a wealth of expertise in the area of circulators. We offer a wide variety of pumps for heating, ventilation, airconditioning, and cooling systems, as well as general circulation and drinking water systems. Having supported its customers in this field for over 50 years, KSB now has a great deal of experience with both large and small pumps. Inhouse research on highquality pumps and industrial valves In addition to pumps and industrial valves which have been established on the market for many years, our success is also based on research and development. Here, we draw on our own international network of research and development facilities for making the best pumps. An important manufacturer of pumps and industrial valves, KSB's technological strengths lie in hydraulic engineering, materials technology and the automation of pumps and industrial valves. We also collaborate with universities, research institutes and partner companies with a view to quickly turning new business ideas into innovative products. As a result, KSB is able to deliver efficient, highperformance components and systems for transporting fluids. We offer you the most comprehensive line of high performance air conditioning components available. Every Vintage Air

product incorporates the very latest technology available and offers you the greatest efficiency and reliability available.

Our goal is to help you cool your specialty vehicle in a more informed way with parts specially designed for street rods, sport trucks and performance cars. We want to supply you what you really need to get the job done right. Therefore, we are always interested in your air conditioning questions and we welcome technical inquiries. Feel free to call or write. San Antonio, TX 78266 P. 18008626658 F. 2106543113.
